Tupelo Water & Light Department
Residential Electric Rates

Rates effective May 1, 2026.

These rates apply to all customers receiving residential service.

Customer Charge	$11.56
Energy Charge – per kWh	$0.07865
FCA Charge – per kWh	$0.03025

NOTE: TVA's Fuel Cost Adjustment (FCA) charge adjusts wholesale rates up and down as the costs of generator fuel and energy TVA purchases from other suppliers rise and fall. The FCA will help recover costs as they occur by matching revenues to changes in these expenses. TVA sets the FCA amount monthly based on the difference between TVA's baseline and forecast amounts for fuel and purchased energy. The FCA is applied to the energy portion of your bill only.
